Postscript
CALS
HPGL
PDF
CGM
Many more!!!

Available Platforms

SGI
HP700
IBM RS6000
SUN-SPARC
and more.

UG/Partfile Drawing

Why ForReview? To reduce product development time by enabling users anywhere in the world to quickly and easily share drawings, models, product specifications, bill of materials, work instructions, and other related data and documents.

Easy and intelligent visualization of product data helps simplify and expedite the engineering change order (ECO) process. Intuitive markups of drawings, tools for visual checking, compare & revision management, and powerful local and remote printing help reduce time-to-market and development costs.

Who will use it? Anyone involved in product, engineering, or document review processes. Users can deploy visual and concurrent engineering processes throughout the enterprise to significantly reduce time and costs involved.
