

ForReview Web Plug-In

The **ForReview™ Web Plug-In** by Allegria Software, Inc. a perfect addition to the ForReview family of products that enhances the document review process. The **ForReview™ Web Plug-In** enables intelligent viewing and printing of documents anywhere in the world by extending **ForReview's** capabilities to any web-browser.

As in the desktop version of **ForReview**, the **Web Plug-In** supports raster and vector formats. It works with any web-browser such as Netscape Navigator and Microsoft Internet Explorer, and can be used with most EDM/PDM web clients.

With many of same point-and-click features as **For-Review Professional**, the **Web Plug-In** makes reviewing documents and their markups possible with a simple right-click of the mouse.

- Zoom, pan, and flip/rotate functions allow exploring documents in detail.
- Markup and drawing layers can both be turned on or off.
- File Extension and MIME Type Managers allow users to add or remove desired file formats and MIME types supported by the plug-in.

- Printing of documents in portrait or landscape mode, at any zoom level, with or without their markups completes the web-reviewing processes.
- Multi-page documents are supported.

Sharing information over the internet is becoming more important in today's fast-paced global business environment. The **ForReview Web Plug-In** features allow any portion of a document to be analyzed in detail over the internet, a benefit unavailable when only using a web browser.
